

The Imitation Game

David Ferry
CORE 1000 – The Most Human Computer
Saint Louis University
St. Louis, MO 63103

Let's play a game:

Technology changed communication even before AI!

Who is talking here, a human or a machine?

Is the communication legitimate or illegitimate?

PD

Payroll Department <payroll@list.slu.edu>

To: dferry@slu.edu

This email is being sent to notify you that you, added, changed, inactivated, or reordered your direct deposit records in Banner Self Service yesterday or that a pre-note account has now been changed to an active account in your records.

There is no need to contact payroll services, unless you have a question regarding your changes.

Thank you.

Hi David,

Did you know that 76% of students* have either tried or are regular users of AI? We're ready to help you navigate AI to deepen engagement, equity and effectiveness this fall.

Maureen

I just wanted to let you now we got in safe! But the airline lost my wallet, I need \$200 for the flight back OK?

My email (in part):

New this year is that all 1818 students will have access to SLU library resources and digital journals. In particular for us, this means access to IEEE Spectrum (a high quality computing and engineering trade magazine) and the ACM Digital Library- between IEEE and ACM you have the majority of high quality computer science research coming out these days.

Response (in whole):

You are correct that I teach in the Spring. How do they get access to IEEE Spectrum (a high quality computing and engineering trade magazine) and the ACM Digital Library- between IEEE and ACM you have the majority of high quality computer science research coming out these days.
