

Midterm 1 Information

- The first midterm will be on Friday, 28 September 2018, from 10:00–10:50am.
- The exam will cover all lectures, readings, and assignments up to and including the class on Monday, 24 September 2018. (please see the class schedule for exact coverage)
- The exam is closed book, however you may prepare in advance *the back of this page* with whatever notes you wish to place on it, and you may use this page during the exam. When the exam is over, turn in this sheet with the rest of your exam.
- The exam is entirely pen-and-paper based. You may not use the computers nor any other calculating devices.
- Questions will be similar in style to the weekly quiz questions, covering general knowledge of Python's syntax and execution, and general modeling of algorithmic processes. Typical questions will require the identification of errors in existing code, hand-simulation of existing code, and the creation of small code fragments to accomplish a given task.
