

Exam 3 Information

- The final exam for this course will be on Wednesday, 13 Dec 2006, from 2:00–3:50pm.
- This exam is closed book and no calculating devices of any type will be allowed. However the following aides are allowed:
 - On the day of the exam, we will provide you with a copy of the relevant documentation regarding the Brookshear CPU and with the CIA and Movie databases.
 - In addition to the notes provided by us, you may prepare your own personal notes onto both the front and back of another sheet of paper, for use during the exam. When the exam is over, submit this sheet to the rest of your exam.
- The format of the midterm will be as follows. There will be 14 questions available on the exam. Each student must choose to solve exactly 12 of the 14 questions. Students are free to read all of the questions, and make attempts, before deciding which 12 to select. However the student must explicitly mark which 12 problems are to be graded (if this is not clear, we will assume that the first 12 problems are to be graded).
- The potential coverage of material will be as follows. Approximately 50% of the questions will cover “new” material, that is topics which were introduced since the last exam. Specifically, this range include coverage of lectures from Monday, 6 Nov 2006 through Monday, 11 Dec 2006, as well as the associated readings and homeworks for those topics (please see the class schedule for exact coverage).

The remainder of the exam will be cumulative, revisiting *major* topics from the first two-thirds of the course.
