Midterm 1 Information

- The first midterm will be on Tuesday, 17 February 2009, from 10:00–10:50 am.

- This exam is closed book and no calculating devices of any type will be allowed. You are allowed, however, to prepare in advance *the back of this page* with whatever notes you wish to place on it, and you may use this page during the exam. When the exam is over, submit this sheet with the rest of your exam.

- The exam will cover all lectures, readings, and assignments up to and including the lecture on Wednesday, 11 February 2009. (please see the class schedule for exact coverage)

- Typical topics for examination might include our general transition to the C++ language, writing small code fragments, or simulating code either by demonstrating produced output or diagramming the internal state.

  As an example, we will distribute a hard copy of last semester's first exam and the solutions to that exam. Please keep in mind that we used a different textbook last semester, and so the order of topics was slightly different.
