

Final Exam Information

- The final exam is schedule for Wednesday, 7 May 2014, from 12:00–1:50 pm (**please note the time**).
- The exam is cumulative, but weighted toward material that has been covered since that which was covered on the previous tests. If we consider the course broken into thirds based on the timing of the exams, I expect 25% of the final to be on the first third, 25% of the final on the second third, and 50% of the final on the most recent third.
- This exam is closed book and no calculating devices of any type will be allowed. As with other exams, you may prepare notes in advance and use them during the exam. Since this is a cumulative exam, we will allow you to use *two sides* of paper for your notes. When the exam is over, submit your sheet with the rest of your exam.
