Requirements Review

1. Will the system support automatic grading?
2. Can instructors decide which questions are graded automatically and which questions are graded manually?
3. Instructors can input and change quiz scores
4. Students can view their quiz scores
5. Instructors can decide on the number of questions and question types included in the quiz
6. The system can shuffle questions in random order
7. Why are we using Java instead of a web interface language?
8. Are the quizzes intended to be 1 question type only?
9. If so, are the students able to choose which question type to take?
10. Dos the system support an option for multiple quiz attempts?
11. Are the students and teachers automatically in a class or does the teacher need to create the class and students sign up for them?
12. Are we designing a menu?
13. Do we need a sign-in?
14. Is there a directory of quizzes?
15. Is there a quiz timeline?
16. Can you save a quiz and come back to it?
